

## Predocctoral Fellowship – FPI 2021

A fully funded PhD position will be available within the FPI 2021 program (*Formación de Personal Investigador*), associated with the project “A knowledge-driven approach to the development of novel asymmetric electrochemical methodologies” (PID2020-116859GA-I00) funded by MICINN (*Spanish Ministry of Science and Innovation*).

**Job title** Four-year PhD fellowship (FPI program)

**Research topic** Sustainable asymmetric catalysis; synthetic electrochemistry

**Supervisor** Dr Xavier Companyó | email: [x.companyo@ub.edu](mailto:x.companyo@ub.edu)

**Website** <http://companyolab.com>

**Institution** Section of Organic Chemistry, Department of Inorganic and Organic Chemistry, University of Barcelona

**Selection criteria**

- Hold a Master’s degree in Organic Chemistry or a related area.
- Previous experience in organic synthesis and/or asymmetric catalysis is desirable.
- Good oral and written communication skills.
- Be motivated, enthusiastic, organised and collaborative.

**Starting Date** June 2022

This advertisement is intended to identify potential candidates to occupy the position. The official call is expected to be opened in mid-October 2021. **If you are interested in the position, please send a CV to Xavier at [x.companyo@ub.edu](mailto:x.companyo@ub.edu) before 15<sup>th</sup> October 2021.**
